LINING-OUT STOCK

Better stands. Pot plants have a better root system and stand the shock of transplanting better than bare root stock. You get better stands; it costs you less per plant care for them in the field; you have more finished stock to sell.

Better growth. Pot plants start off quicker and make a better first season growth; thus they are ready to market sooner.

You can plant later. Pot plants can safely be set out in the field much later than bare root stock. This gives you more planting time in your busy season. With irrigation you can plant nearly all summer.

| | <u>SHRUBS</u> | Per 100 Each | Per 1000 Each |
|--|---------------|-----------------|------------------|
| Barberry | | | |
| Mentorensis, 2 $\frac{1}{4}$ inch pots | | .25 | .20 |
